Float Charging Voltage 13.6 V~13.8 V @ 25°C Temperature Compensation: -3mV/°C/Cell
Cycle Use Voltage 14.6 V~14.8 V @ 25°C Temperature Compensation: -4mV/°C/Cell
Discharge: $-20^{\circ}\text{C}^{\circ}60^{\circ}\text{C}$ Operating Temp. Range Charge: $0^{\circ}\text{C}^{\circ}50^{\circ}\text{C}$ Storage: $-20^{\circ}\text{C}^{\circ}60^{\circ}\text{C}$
Nominal Operating Temp. Range 25°C±5°C
Valve Regulated Lead Acid (VRLA) batteries can be stored for up to 6 months at 25°C and then recharging is recommended.  Monthly Self-discharge ratio is less than 3% at 25°C.Please charged batteries before using.
Container Material A.B.S. UL94-HB, UL94-V0 Optional.

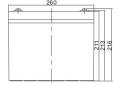

## **Description and Features**

VRLA EV Series is specially designed for frequent discharge in deep cycle applications. EV batteries offer reliable performance in high load situations and have a high cycle durability due to the specially designed active material, strong grids and thick plate construction. The addition of carbon ensures faster full recharging of the battery and longer battery life. This stable and durable battery is completely sealed and maintenance free.

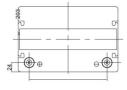

## **Features**

- Absorbent Glass Mat technology
- Long service life 50% more cycles than VRLA AGM
- Faster full recharging quick use of application
- Suitable for (deep) cycle applications

(Note) The above characteristics data are average values obtained within three charge/discharge cycle not the minimum values. The battery must be fully charged before the capacity test. The C10 should reach 95% after the first cycle and 100% after the third cycle.
